

Conventional honey

- Item #** 72-HONEY
- Date Issued:** 11-04-02
- Description:** U.S. Grade-A honey is a sweet, viscous composed of nectar gathered by the honeybee and stored in the comb. It has been extracted from the comb.
- A. Color:** White- 34mm pfund max.
Extra light Amber (Alfalfa)-35-50mm pfund
Light Amber-51-84mm pfund
Amber- Darke
- B. Shelf Life:** Shelf life of honey is 2 years when processed honey has been stored properly at between 64-75F. Properly processed, packaged and stored retains it quality for a long time. In the event honey crystallizes, heating, which "melts" the crystals, may reverse this.
- C. Extraneous Matter:** Free from particles of comb, propolis, or other foreign matter.
- D. Packaging:** This product is packaged for the general customer in 5 gallon FDA approved pails, drums, plastic or stainless steel totes. All plugs for the drums are secured with safety seals and are rust free.
- E. Markings:** Each drum is marked with product name, supplier and location, net weight and production code.

Chemical & Physical Properties:

Solids:	81.4-83.0
Ash:	0.2% Max.
Sucrose:	2.5% Max.
Moisture:	18.6% Max.
PH:	3.9(3.4-6.1)
Viscosity:	
Water Content:	18.2%
Specific Gravity	
Water Content:	18%

Microbiological:

Salmonella:	Negative
E. Coli:	Negative
Coliform :	Negative
Staph Aurcus:	Negative
(Coagulase Positive)	
Standard Plate Count:	Less than 5000gm
Yeast & Mold:	Less than 10

Microscopic Extraneous Matter:

IF	50gm	Less than 10
----	------	--------------

Processing: Honey is heated to a mild temperature to destroy osmophilic yeasts and to delay crystallization. It is then filtered with final filtering composed of two 150-mesh micron filter bags.

Purity: Our honey is periodically checked and laboratory tested for the purity of the honey and for any pesticide residues. An independent, outside laboratory is used for this purpose.
